

ADVANCE INFORMATION SHEET

THE HISTORY OF EXPLORATION

Early humans were nomadic. They needed to follow the herds of animals that were their food source. Only with the advent of farming and the domestication of animals did the first settlements begin to form. From these permanent bases early man started to explore. *The History of Exploration* charts these first endeavours following mankind's insatiable desire to learn more about the world he lives in. A timeline on the right hand side of each spread allows you to monitor the exodus from Africa, the settlement of Asia, Australia and Europe, through to the exploration of the deepest oceans and finally into space.

CONTENTS: Early exploration • Exploration of Europe • Exploration of Asia • Exploration of South America • Exploration of Australia and New Zealand • Exploration of Antarctica • Exploration of Africa • Exploration of North America • Exploration of the Pacific Ocean • Underwater Exploration • Exploration of the Skies • Space: The Final Frontier • Tools of Exploration • Organisations, Institutes and Museums • Explorers' biographies • Index • Bibliography

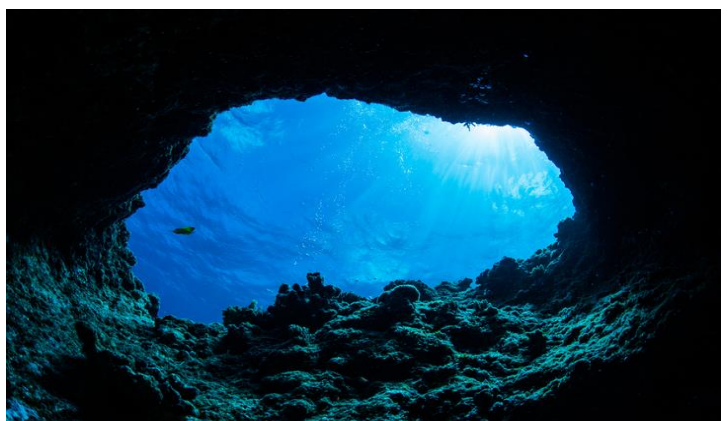

KEY SELLING POINTS

- Charts the entire history of exploration from the earliest beginnings to the exploration of space
- Learn about famous explorers, old and new
- Follow the advances in technology that allowed man to discover more of the planet and beyond
- Over 300 photographs and maps

SPECIFICATION

Format: 234 x 156mm, Pb with flaps
 Extent: 256pp, Approx. 70,000 words
 Illustrations: Over 300 colour illustrations
 ISBN: TBC
 UK RRP: TBC
 Publication: 2019
