

ADVANCE INFORMATION SHEET

THE BIG QUESTIONS: GENETICS

Some questions are so big that everyone should know the answer. *Genetics: The Big Questions* takes readers deep into the science of inheritance, one of the most fascinating and controversial subjects of our time. *Genetics: The Big Questions* explores how DNA, a spiralled polymer in every living cell, have given rise to the natural world. To do that we tell story of how the mysteries of the DNA molecule were revealed and the process by which its billions of encoded characters are translated into living bodies. The forefront of our technology is now probing the workings of genes, seeking to control the blueprints of life. However, this is not such a new endeavour: Human civilisation began in the first place thanks to our ability to exploit the varying genetic characteristics of plants and animals.

The Big Questions: Genetics sweeps away the complexity of this most fascinating of sciences, giving a clear insight into how genes run the world.

The Questions

- How did 'genetically' chosen seeds help mankind survive and grow?
- What is Genetic Dominance?
- How is DNA structured?
- Is GM food good for us?
- Can Stem cells cure everything?
- What are DNA parasites?
- Is there a future for Epigenetics?
- Where will Xenobiology and synthetic XNA take us?

Key selling points

- ♦ Provides definitive or *Best Guess* answers to 12 fundamental questions
- ♦ Written in an easily accessible style with numerous illustrations
- ♦ Suitable for anyone with an interest in science
- ♦ Certain to provoke interesting discussions
- ♦ Internationally relevant

SPECIFICATION

Trim Page Size: 216 x 138mm
 HB
 Extent: 192 pp, 32,000 words
 Illustrations: up to 50 images
 in 2 colours
 ISBN: 978-1-84931-088-8
 UK RRP: £12.99

SERIES EDITOR

Tom Jackson is an experienced author and editor of information and reference books with dozens of titles to his name. He is based in the UK and has worked for major international publishers, including Bloomsbury, Scholastic, Hachette, National Geographic, the BBC, and Dorling Kindersley. Tom's past work covers all areas of science, technology, and natural history and he is a specialist in the history of science.
